ThoughtWorks as Senior Consultant

2026 . Feedbacks

"I feel confident that I can rely on José to unblock technical issues or provide sound technical guidance."

- *(Options: Agree / Neutral / Disagree)*

Agree. I strongly agree. José has excelled since stepping into the Technical Anchor role, consistently demonstrating deep technical expertise. He has been instrumental in addressing our technical debt, taking true ownership by leading our Tech Debt sessions and driving actionable results. I also want to commend José's incredible resilience. It is truly inspiring to see him fully empowered, highly motivated, and delivering at such a peak level. Thank you for your vital contributions to the team's success.

"What is one thing I should **start**, **stop**, or **continue** doing to better support the team as an Anchor?"

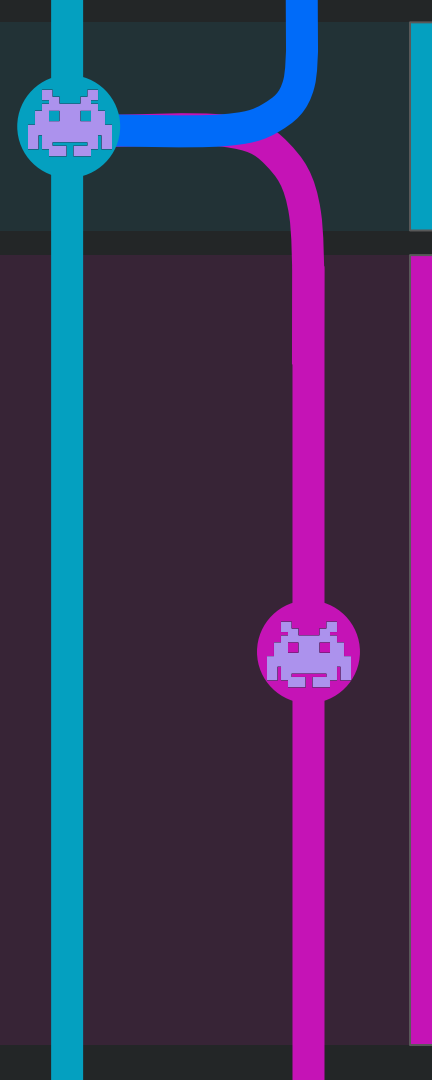

Continue being as approachable and collaborative as you are right now. I really appreciate how open you are to jumping on a call to review bugs together and coordinate fixes. Your code quality is excellent, resulting in very few defects during testing. Please continue fostering this great synergy between Dev and QA/Testing, as it makes unblocking technical issues much easier and faster for the whole team.

"José ensures our technical deliverables meet the required standards (code quality, architecture, and DoD) without being a bottleneck."

- *(Options: Strongly Agree / Agree / Neutral / Disagree)*

Agree. José has taken outstanding initiative in addressing our technical debt, and his leadership in these focused sessions has directly improved our overall code quality. He consistently brings valuable ideas and proactive solutions to continuously enhance our codebase. While our recent work hasn't presented as many opportunities to collaborate deeply on architecture and Definition of Done (DoD), I have complete confidence that José will bring the same excellent perspective, rigor, and high standards to those areas when the time comes.

2025.Performance_Evaluation

José Cândido Filho demonstrated consistent performance at the **Senior Consultant/Senior Associate (Expert track)** grade throughout the 2025 cycle, meeting most expectations and exceeding them in technical execution and adaptability.

The following breakdown details his performance across the required dimensions:

Functional Skills & Impact

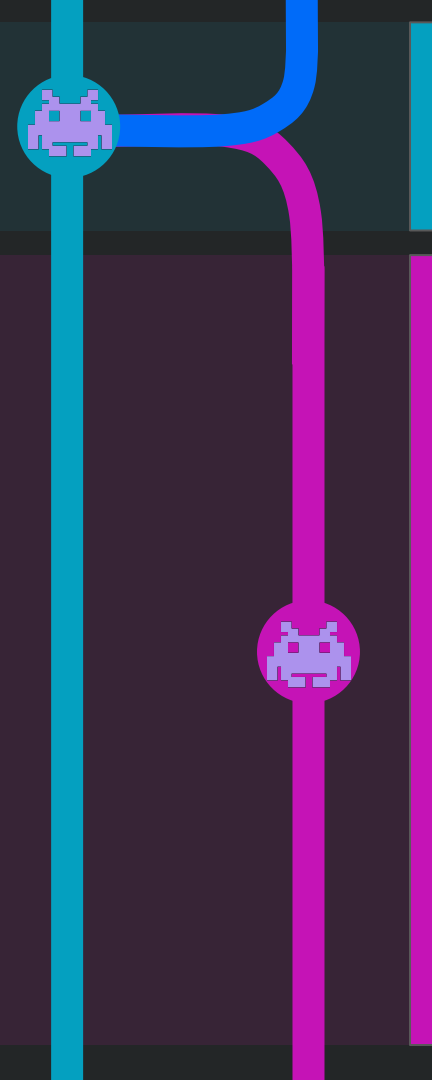

- **Demonstrated Expectations:** José displayed "in-depth conceptual and practical expertise" in his discipline, a core requirement for his grade. He applied strong skills in **C#, the MS Tech Stack, and general programming** to deliver high-quality, reliable code.
- **Exceeded Expectations:** His ability to achieve **rapid mastery of the Boomi platform** was highlighted by both his manager and peers as exceptional. He was described as an "exceptional developer" whose speed and reliability directly impacted the project.
- **Specific Example:** José was instrumental in building a **Proof of Concept (POC) for Salesforce and AMS integration** under tight deadlines. The client noted he "picked it up really fast and got it up and running in no time".

Problem Solving

- **Demonstrated Expectations:** Consistent with the Senior grade's requirement to solve complex problems and take new perspectives, José navigated significant **technical ambiguity and legacy system challenges**.
- **Exceeded Expectations:** He demonstrated high **adaptability**, successfully pivoting from the Sales System to the Agency Management System when project priorities shifted.
- **Specific Example:** He quickly understood complex legacy systems, allowing him to add or modify custom code with minimal ramp-up time.

Business Expertise

- **Demonstrated Expectations:** José met the grade expectation of understanding "Why" business decisions are made and how technical work creates value.
- **Specific Example:** He shared insights into project processes—such as **test processes and feature flag management**—which improved operational excellence and supported the client's business goals.

2024.Performance_Evaluation

Consistently met expectations

Has performed consistently and may have sometimes exceeded expectations for the current grade level in the performance cycle. Consistently demonstrated behaviours expected for their position.

This is José's first cycle at TW, and IPSOS is his first client. He maintained a sense of self-responsibility regarding his summit and managed to collect various feedback from his peers and the client, which will be positive for his journey.

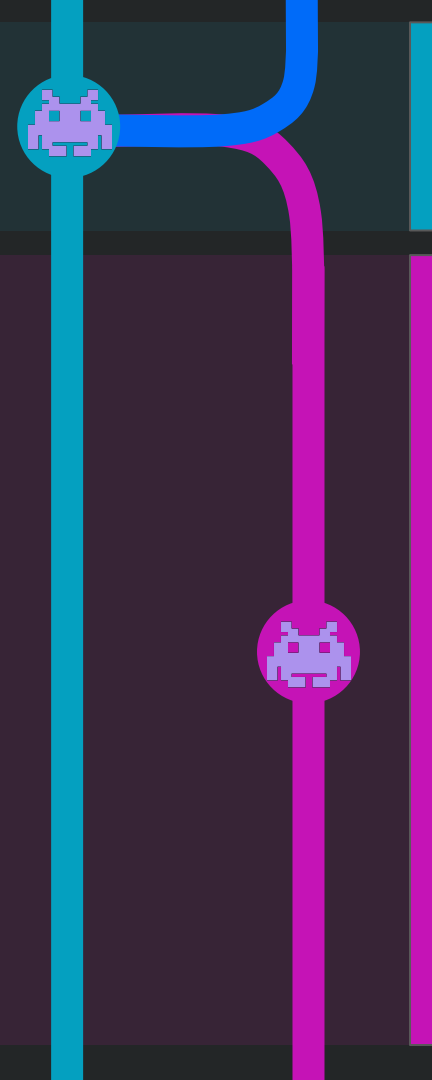

Technical Mastery: According to feedback from peers, AP, and the client, the technical quality is remarkable, as well as the deep knowledge as a back-end developer. There is also strong partnership in infrastructure contexts and support for the team with front-end demands. Continuous effort to stay up to date with new practices and trends, along with a sense of continuous improvement, was emphasized.

Problem Solving: Significant technical challenges were addressed, such as creating GCP environments and collaborating to ensure the project's milestones were achieved. Contributions were recognized as positive both technically and commercially. Feedback highlighted the ability to rationalize complex and abstract contexts.

Documentation and Knowledge Sharing: Proactive engagement in tackling challenges, exploring contexts, and sharing learnings with the team was noted. Useful and detailed artifacts were produced to promote clear understanding among team members.

Client Engagement: Business context and client needs were understood, helping connect the project goals to strategic priorities.

Interpersonal Skills: Empathy, care for the team, collaborative behavior, responsibility, and concern for the team's well-being were demonstrated. Active and effective listening fostered an environment for healthy discussions.

2024 . Feedbacks

- **Technical Knowledge:** Positive feedback was received regarding strong conceptual and practical foundations, quality deliverables, and versatility—for example, recognized contributions in infrastructure topics and front-end support. i.e.: "...very technically advanced developer, you always manage to do very well in any story you work on, both in the back-end and front-end.", "...bringing stellar infrastructure skills to the team. Extremely comfortable developing both back and front ends of user stories."
- **Project Impact:** Fundamental contributions in various deliveries demonstrated a positive impact on client activities, aligning with role expectations. The business context and client needs were understood, connecting project goals to strategic priorities. i.e.: "Our team is achieving our goals and delivering amazing value for our client with a very positive impact on those results.", "...commitment to our work is quite visible, with a clear sense of ownership of the overall product and not just the parts worked on."
- **Collaboration:** Positive feedback highlighted a strong sense of collaboration, knowledge exchange, and efforts to develop collaborative solutions. A clear example was participation in documentation efforts and GCP environment setup. i.e.: "...natural tendencies to make artifacts to document work for future users as you are building.", "...initiative to create centralized documentation and organize information independently."
- **Leadership Skills:** Effective leadership over smaller workstreams, such as infrastructure setup, significantly contributed to aligning the team with client goals. i.e.: "Excellent job taking on responsibility over smaller streams of work. An example is naturally becoming the go-to person for the creation of GCP environments. Also takes the lead in identifying what is needed for new features and follows up with suggestions and direction."
- **Communication:** Despite areas for improvement, ideas were clearly presented during critical moments, influencing well-founded decisions. i.e.: "...communication skills are good... potential to develop into a true leader of technologists...", "...very strong communication skills, always striving to keep the entire team up to date with important information, contributing greatly to leadership potential."
